

June 28, 1984

Memo to File:

RE: Mining and Reclamation Plan  
Review for the North Lily  
Project  
Lee Mining Company  
PRO/023/007  
Juab County, Utah

The Division has conducted informal conferences and advised the company numerous times regarding revision of the MRP throughout the Winter-Spring 1983 - 84 time period. At many points, individual members of the review team (composed of Steve Cox, Ev Hooper, Shannon Storrud (now replaced by Pam Grubaugh-Littig) and Tom Tetting have talked with company representatives Doug Lee and Bart Hanford. In addition, cooperation with the State Health Department has been maintained through Brian Nelson at the Division of Water Pollution Control.

The submittal of the revised MRP on May 30, 1984 was made after the previous Division comments were informally presented to Bart Hanford a week before. The company has continually strived to facilitate the exchange of comments by personal attention and face to face meetings rather than anticipate lengthy mail delays.

Thomas N. Tetting  
Geologist
